

GTU CSE 241 / 501 Quiz

Std Code: 236

Std Number:

2	1	0	1	0	6	0	0	6	0	1	7			
---	---	---	---	---	---	---	---	---	---	---	---	--	--	--

Using ADHOJPOCE STDJ

```
bool search(const int a[], int target, int right) {
    // right-1 is my index from end.
    if (right-1 < 0) return false;
    if (a[right-1] == target) return true;
    else return search(a, target, right-1);
}
```

```

int* create(const vector<int>& v, int index=0, int min=
    v[0], int max=v[0]) {
    if(v.size() < 1) exit(1);
    if(index+1 > v.size()) { // means end
        vector<int> dvec;
        dvec.push_back(min);
        dvec.push_back(max);
        return dvec; }
    // min and max are initialized by default
    if(v[index+1] < min) min = v[index+1];
    if(v[index+1] > max) max = v[index+1];
    return create(v, index+1, min, max);
}

```
